

Software Tools

We use TRADOS, the leading Translation Memory tool, for translation. Apart from TRADOS and all the Microsoft® Office programs, we are comfortable with using a wide range of Desktop Publishing, Localization, and CAD software packages including AutoCAD®, InDesign®, Photoshop®, QuarkXPress®, Framemaker®, Freehand®, Dreamweaver®, Fireworks®, RoboHelp® and many other file formats. This means that you can send your files to us in virtually any format and receive your localized files in the same format, saving you time and money.(All trademarks are the property of their respective holders.)
